PRODUCT OVERVIEW

Digital Signage Software is a software that helps the user to easily control and manage their digital signage screens. It gives the capability to update the screens' content remotely, either individually or in groups. Besides, the user can schedule the contents to display at any specific time of the day, for example, display the HR's important notice at the end of every shift, update the Managers on Duty's details for the current shift. Or even schedule the content for the whole month in advanced. These and a lot more are all customizable within the software. Contact us for more details.

Here are some of the key features of the software:

Full HD Video

Support FHD video, with video auto format conversion to MP4

HD Content Support

HD content support for images, html, web links, media RSS

Streaming Support

YouTube, RTSP, RTMP, Shoutcast, IP Camera, UDP (IPTV)

Offline working

Once the content is uploaded, players can work offline without interruption

Customizable Layout

Choose from a variety of template layout or design one on your own

Playlist Scheduling

Schedule up to 20 playlists and option for default playlist when no playlist is scheduled

TV On/OFF Playlist

Turns your TV on & off with TV_OFF playlist scheduling

Advert Playlist

Option to play multiple advert playlist content at selected intervals

Ticker Support

Insert a Ticker with customizable CSS. Ticker can be RSS or plain text
