Biometric Access Control and Visitor Management System

Biometric Access Control system refers to the recognition of human beings by their physical uniqueness. The system holds the door for intruders and prevents them from accessing the resources by verifying them as unauthorized persons. One of the main features of the Systems is its capability to integrate with Visitor Management System where two disparate systems (Visitor Management System and Biometric Access Control System) can be brought together to perform as one and to leverage on each sub system's strength to record and manage visitor flow within a building / premise.

Biometric and Non-Biometric devices Supported

Support latest technology of biometric recognition like **Face, Fingerprint and Iris recognition**. Legacy technology such as card reader and keypad also supported.

COVID-19 Safety Measures

Support face recognition with face mask on, and temperature screening.

Integratable with Visitor Management System

Integrate Visitor Management System and Access Control System to leverage each sub system's strength to record and manage visitor flow within a building / premise.

Online Pre-Registration for Visitor

Support Online Pre-Register via web interface prior to the visit.

ID Card and Passport Reader Integration

Integrate with the ID Card and Passport Reader to cut down on-premise registration time by read all the info from the ID Card or passport to fill in visitor's check in form.

Visitor Category Listing

Support Visitor Category customization such as Deliveryman, Contractor, normal visitor, and others.

> *Biometrics is certainly the most secure of authentications, It's the hardest to imitate and duplicate.*
>
> *-Avivah Litan, Gartner Research*

Self-Expiring Visitor Badges

Support Self-Expiring Visitor Badges to prevent badge reuse and therefore do not need to be collected at the end of a visit.

Roll Call Counting Screen

Roll Call feature to ensure safety of building occupants during building evacuation.

Real Time Visitor Status Tracking

Track real time status of the Visitor from the system dashboard.

Whitelist and Blacklist Visitor

Notify Host and operator upon Blacklist Visitor entering premise.

Real Time Transaction Event

Event transactions are processed immediately as they occur without any delay to accumulate transactions.

Searchable Visitor History

View historical data on a particular visitor's visit to the premise.
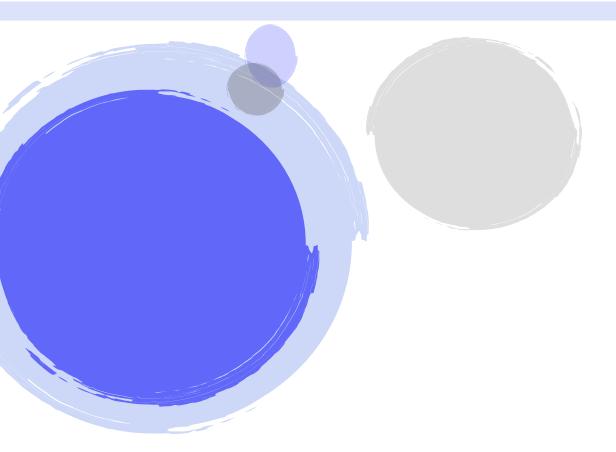

Interactive Floor Plan

"Draw a picture" to help simplify and present your floorplans in a visual way that is easy to digest.

Unlimited Access Level Configuration

Configure unlimited user roles with different levels of system's and device's access.
